

Position: Software Engineer, UI
Company: Liquid
Work Location: Westminster, CO

Who We Are

Liquid is doing for AI infrastructure what VMware did for x86 servers, bringing the agility of the cloud to the on-prem datacenter to dynamically allocate and share GPUs, memory, and other resources. This functionality is critical in running AI and advanced-data workloads in production (a.k.a. Inference). Liquid Matrix software enables global organizations to accelerate the adoption of AI, HPC and VDI by unlocking the bottleneck of GPU utilization and availability through dynamic pooling and sharing of AI resources for higher performance with less total cost, less power and less hardware.

Are you ready to join an industry-disrupting team? We're looking for a UI Developer to help us take our products to the next level.

Key Responsibilities

- Design, develop, and unit test Web UI software using JavaScript and Vue.JS.
- Design, develop, and unit test Terminal UI software using Python and the Textual framework.
- Interact with the Quality Engineering Team to identify, fix and close defects.
- Assist with the setup and usage of 3rd party tools from time to time.

What You Bring

- Bachelor's Degree in Computer Science, Math, Engineering or a related field.
- Fluent in JavaScript and Python.
- Familiarity with the Linux environment.
- Familiarity with the Git version control system.
- Proficiency in Agile methodologies and collaborative engineering processes.
- At least 4 years of experience in the IT industry, with a focus on UI development.
- Experience with customers in the AI, HPC, and/or Media and Entertainment spaces is preferred.
- Familiarity with PCIe and CXL is a plus, but not required.
- Exceptional communication and presentation skills, capable of engaging technical and non-technical audiences.
- Strong consensus-building and persuasion skills.
